

# Sample API Review

Virusologia sample deliverable / public preview

## Coverage model

- ? Inventory first: operations, sensitive flows, and object parameters.
- ? Role/state matrix is explicit.
- ? Read-only replay is used for evidence gathering.

## Guardrails

- ? Unconfirmed BOLA or IDOR does not become a published finding.
- ? Coverage gaps are labeled honestly.
- ? Evidence is redacted before sharing.

## Outputs

- ? Inventory notes.
- ? Role differential evidence.
- ? Retest criteria for the engineering team.
